# TIPS TO KEEP OFF-SITE WORKERS PRODUCTIVE

**DELL**

**34%**
of all employees believe they're more productive working outside of the office*

**52%**
work outside of a traditional office at least once a week

**28%**
say they get more work done while remote due to a reduced commute

Letting employees work how and where they want produces better performance overall. Here are some ways to create a flexible work environment and help them thrive.

**1** **Extensive connectivity:**
Wireless technology gives off-site workers the ability to connect anywhere and to any device.

**2** **Advanced security:**
They need security that works with their workflow, instead of against it. Overly restrictive policies block productivity.

**3** **Smarter Meetings:**
Seamless technology is key to collaborate with on-site employees or other remote workers.

**4** **Mobility:**
Thin, light PCs that encourage agility are essential, even when traveling from the home office, to the coffee shop to back again.
